

Emmanuel Imolorhe

I am genuinely enthusiastic about crafting exceptional user experiences through user-friendly and captivating web applications.

EXPERIENCE

Crescat AS, Remote — *Frontend Web Developer*

AUGUST 2022 - JULY 2023

- Collaborated with team members to develop an event management system, which serves a huge customer base. Currently over a milestone of 25 thousand events created. Frontend technologies such as VueJs and Tailwind were used
- Played a key role in migrating the legacy system from Vue 2 to Vue 3, with TypeScript support
- Developed functional user interfaces (UI) for application functionalities in accordance with design guidelines
- Developed UI design solutions for impromptu additions to the application's functionalities
- Crafted optimized logic to maintain the quality of the application's UX
- Worked along with coworkers to keep the team's progress coordinated

HabariPay, Lagos — *Frontend Web Developer*

APRIL 2021 - **PRESENT**

- Contributed majorly to the frontend development of a payment gateway system serving a large customer base using frontend technologies such as ReactJs and NextJs
- Built responsive UI layouts for new features on the application, based on design specifications
- Wrote optimized logic that preserves the quality of the UX of the application
- Came up with UI design alternatives for new ad-hoc features on the application
- Developed an interactive, functional and visually appealing website and blog for the effective marketing of the product, using NextJs and Wordpress respectively.
- Collaborated with team mates to ensure progress stays in sync

LANGUAGES

English

Zhaptek Enterprises, Lagos — Frontend Web Developer

JANUARY 2018 - JANUARY 2021

- Handled the frontend development of web apps for Zhaptek clients primarily using VueJs, HTML & CSS
- Converted UI designs into fully functioning features, following the documented specifications
- Developed a Point of Sale solution which is offline-first and has real-time synchronization to the cloud, used for operations in neighborhood stores in remote areas.
- Was responsible for the quality of the client web applications handled by Zhaptek
- Contributed to the design of new Zhaptek client product ideas, technology choices and architecture
- Brainstormed with the Zhaptek design team to improve existing designs for functionality and accessibility

Syscomptech, Lagos — Frontend Web Developer

MARCH 2017 - JANUARY 2018

- Built some finance based web apps for Syscomptech clients using Php based technologies
- Refactored some existing applications for logistics booking and management
- Built and maintained websites for Syscomptech businesses using Wordpress and other technologies
- Improved quality of existing websites; in design and performance
- Maintained the primary Syscomptech website
